
**APPENDIX B
MICHAEL UHL
SPILL ACTION PLAN**

MARITIME LOGISTICS

Vessel Spill Action Plan

Should a spill occur from any Maritime Logistics Vessel, the “Designated Person-in-Charge” will coordinate all initial spill cleanup activities on board the vessel and at the spill site. This “Person -in-Charge” will follow the Action Steps as listed, and will have the authority to use all Maritime Logistics combined resources to meet that goal.

IMMEDIATE ACTION STEPS

1. **SAFETY OF PERSONNEL**

- A. Warn all persons on board and in immediate area.
- B. Initiate Evacuation of all non-essential personnel.
- C. Don Personal Protective Equipment (PPE), if deemed necessary.
- D. Unless briefed otherwise, the evacuation signal shall be one long blast (10 seconds) and the assembly point will be the stern of the vessel.

2. **ESTABLISH SAFETY AND SECURITY ZONE**

- A. Determine the extent of the safety zone. Use your common sense.
- B. Secure Safety Zone to all unauthorized personnel.
- C. Enforce Safety inside the zone.

3. **STOP THE FLOW**

- A. If a Spill occurs:
 - 1) Secure any valves necessary to shut off the supply of item spilled. If fueling vessel - close hose valve.
 - 2) Employ Spill Gear immediately to lessen amount of fuel entering the water.
 - 3) Take other actions as necessary.
 - 4) Notify the Fuel Dock. (If fueling)

4. **INITIAL ASSESSMENT AND CONTAINMENT**

- 1) Assess: spill volume, spill movement, fuel type, weather and current conditions.
- 2) Initiate action to contain or divert as necessary on deck and/or in the water with boom and pads.
- 3) Initiate preventative booming to protect natural and public resources.

5. **NOTIFICATION** - Notify all agencies listed at bottom. Notify Antone Sylvester Tug Service management to the extent of damage, injuries, assistance required, etc.

SUPPLEMENTAL STEPS

6. **CONTINUE ASSESSMENT AND CONTAINMENT**

7. **DETERMINE RECOVERY EQUIPMENT REQUIREMENTS**

8. **SETUP COMMUNICATIONS AS REQUIRED**

- 1) Cellular Telephone will be primary if available.
- 2) VHF Radio will be back-up, monitor channel 10 / 156.65 MHz.

9. **RECOVERY OPERATIONS**

10. **ARRANGE FOR ON BOARD DISPOSAL** - of oil/oily debris

11. **DECONTAMINATION**

12. **DOCUMENTATION**
